segmentation in early human development, significance of, VIII.1, XIII.8

neurological issues, use of Alexander Technique regarding, III.35

newborn, *see* child

oblique muscles, *see* torso: abdominals

obturator nerve, *see* nerves

oculomotor cranial nerve, *see* cranial nerves

olfactory cranial nerve, *see* cranial nerves

ontogeny

 comparative embryology (Zihlman), V.6
 phylogeny recapitulates ontogeny (Robin), I.14

phylogenesis and ontogenesis: general vertebrate embryology (Drews), V.22

optic nerve, *see* cranial nerves

organs

fascial planes, III.19

myofascial and organ planes, III.18

patterning, *see* movement: patterning

pectoralis minor, *see* back: muscles, *or* shoulder: muscles, *or* torso: muscles

pelvis, *see also* hip

acetabulum and, III.23, III.51, VI.53, X.21

iliopsoas, *see* hip: muscles

joint structure, II.65

joint structure, with knee, II.64

knees forward and away (Rugg-Gunn), *see* Rugg-Gunn

ligaments, XI.42

abdominal muscles and, XI.41

bones and, III.47

locomotion, pelvis/shoulder counter-rotation, *see* Spinal Engine Theory

muscles: abdominals

pelvic girdle and, XI.30

pelvis (recti abdominus/coccygeal connection), IV.21, XI.37

sternomastoid connection (Dimoni), XIII.18

transversus abdominus and pelvic girdle, XI.31

muscles: postural muscles (Ackers), XI.27-28

pelvic floor, III.20

pelvic girdle, III.23, III.51, VI.53, X.21

lateral and sectioned views, X.22

physiology: and relation to directly/indirectly connected muscles (Garlick), X.24, XI.29

postural muscles (Ackers), XI.27-28

seated (Dimoni), II.84, III.50, VI.51, X.19, XI.33

tilt, effect on posture (RAF), VI.26

weight bearing of, II.83

weight bearing of, and pelvic ring, XI.32

peripheral nervous system, *see* nervous system

peroneal nerve, *see* nerves

pharynx muscles, *see* head: muscles, *or* neck: muscles

phrenic nerve, *see* nerves *or* diaphragm

phylogeny

comparative embryology (Zihlman), V.6

phylogeny recapitulates ontogeny (Robin), I.14

ontogenesis and phylogenesis: general vertebrate embryology (Drews), V.22

physics of human motion, *Erect posture and action* excerpt (Feldenkreis), VI.44

Polyvagal Theory (Porges), XIII.53

Porges, Stephen, Polyvagal Theory, XIII.53

posture, postural variations (RAF), VI.26

see also Ackers

prehensile grasp, *see* hand: development, *or* reflexes

primate evolution, *see* evolution

primary control: head-neck-back relationship (Westfeldt), XII.33

psoas, *see* torso, muscles

pterygoid, *see* head: muscles, *or* cranial nerve: trigeminal

pulley mechanism of spine, *see* spine *or* Grundy

radial nerve, *see* nerves

recti abdominus, *see* pelvis: muscles, *or* torso: muscles

reflex

anti-gravitational: postural muscles (Ackers), XI.27-28
grasp reflex, *see* hand: development
prehensile grasp (Le Winn), VII.6-7, IX.28-29
 illustration of, VII.8, IX.26
rooting reflex, VII.24
sucking reflex, re-education using the whispered ah, III.4, VI.7, XIII.50
vital release (Le Winn), VII.6, IX.28
 illustration of, VII.8, IX.26

reptiles, evolution, *see* evolution

rooting reflex, *see* mouth *or* reflex

rotation, *see* movement, rotation

Royal Air Force
